

Fire-Fighting Rubber Boots

www.DX-marine.com
DESIGN BY DX-MARINE

A. *Standard*

GA6-2004

B. *Function*

Made of fire-retardant rubber, non-slip, anti-static, fireproof, waterproof, oil-resistant, anti smashing and anti puncture. There is a thin steel plate embedded in the bottom of the boots. It has good protection for ankle and feet. The interior of the sole is a lining of sterilized canvas and lined with a sponge bottom. The above products are all in line with national standards and can be used in conjunction with fireman's insulation clothing and chemical protective clothing.

The boots weigh about 2.2 kg.
